

Patient Partner – Allied Health / Nursing

360 Knee Systems is an innovative Australian company in the medical device and biotechnology sector specialising in total knee arthroplasty. We are seeking an **Allied Health Professional or Nurse** to join our team. You will be responsible for end-to-end clinical management of lower limb orthopaedic patients including pre-operative, intra-operative and post-operative care.

As a Patient Partner Practitioner:

- Work directly with orthopaedic knee specialists to improve patient outcomes.
- Use pre-operative patient profiling and shared decision-making tools to help patients and their orthopaedic surgeon make great treatment choices.
- Work in a team of experienced Physiotherapists to create and manage a patient specific multidisciplinary program that is delivered both face-to-face and via a telemedicine platform.
- Use technology to monitor patient compliance and individualise treatment plans and goals.
- Work alongside world class biomedical engineers that create patient specific 3D surgical plans.
- Attend surgical procedures and assist surgeons and hospital staff on the use of products including custom instrumentation, navigation systems, robotics, and interpreting surgical plans.

To be successful in this role you will require:

- Health Science tertiary qualification.
- Registration with the Australian Health Practitioner Regulation Agency (AHPRA).
- Passion for acute orthopaedics and orthopaedic rehabilitation.
- Interest in biomedical innovation and technology.
- A willingness to engage in product development within a multidisciplinary team.
- To be ambitious, hard working and enjoy a challenge.

Roles available across Australia.
