

SURGICAL PLANNING TECHNICIAN

Job Description:

360 Knee Systems is an innovative Australian company focusing on improving the outcomes of Total Knee Replacement patients. We are seeking a full-time Surgical Planning Technician to join our rapidly growing team in Pymble, Sydney.

In this role you will be working with the Systems Team to deliver pre-operative surgical plans and post-operative outcome analysis.

Key Responsibilities will include:

- The manufacture of digital pre-operative and post-operative kinematic analyses
- The design of 3D printed patient specific instrumentation
- Process optimisation and involvement in the continual improvement of production processes
- Working with the Quality Team to ensure product realisation and production processes conform to the Company's Quality Management System
- Contributing to the advancement and achievement of the Company's strategic vision

Desired attributes:

- Existing residency in Sydney, Australia
- Experience in technical production, just-in-time manufacturing and/or military operations
- Interest in healthcare, technology, computers and/or videogames
- Ability to pick up software applications, troubleshoot and solve problems
- Attention to detail
- Ability to work effectively in a team
- Ability to prioritise tasks and follow specified procedures

To apply, please send your CV and cover letter to willy@kneesystems.com
